

I was pleased with the installation that went very smooth and we had the first 48 plates made on the second day of the installation, before noon.

- Gyula Hegedüs, Roland Favorit

Gyula Hegedüs, the owner of the family based company Roland Favorit:

“I was pleased with the installation that went very smooth and we had the first 48 plates made on the second day of the installation - before noon. This was a real live job that we used to test the capabilities of the system. This went well and we were very happy with the performance and quality of the system.”

Roland Favorit make brochures, catalogues, etc. on a 4 color GTO52 (B3 size), a 1 color Adast Dominant 714 and a 1 color Adast Romayor 314.

Roland Favorit's average plate consumption is 1,200 plates per month.

They used to buy their processed plates from outside before, so they are now more flexible and have possibilities for much faster delivery.

Gyula Hegedüs, owner of Roland Favorit.
