

“I will always choose processors from Glunz & Jensen. We are used to the high quality, the convenient features and the good cooperation with the company.”

Peter Riis Klausen, Technician at Dansk Avistryk

Dansk Avistryk – far more efficiency in platemaking

Dansk Avistryk is the largest newspaper printing house in Denmark, producing 7 daily circulations along with many local newspapers.

The company produces on 5 printing towers, fed by 7 CtP lines, which produce 30.000 plates per week. All CtP lines include Glunz & Jensen HDX plate processors.

Dansk Avistryk, have replaced one of their CTP Lines with an Agfa :Advantage N-DL XXT along with a Glunz & Jensen manufactured Agfa :VXXP high speed newspaper processor for Agfa N92 VCF chem-free plates*. This will significantly speed up the general time of making panorama plates to now making 100 plates/hour on ONE system instead of 38 pph on one of the existing lines.

Dansk Avistryk

Peter Riis Klausen, Technician at Dansk Avistryk, and Klaus Klim, IT manager at Dansk Avistryk

Peter Riis Klausen, Technician at Dansk Avistryk:

“No tools are needed for our daily service and maintenance of the processor. Also when we talk about our more in-depth service – there is a major difference compared to other machines. Everything is placed on the side of the processor – and is so easy to access. These features make cleaning and service a very time saving operation.”

“The Glunz & Jensen service organization is very easy to contact, and this is very critical for us, especially when talking about spare parts. By ordering parts through the Glunz & Jensen Spare Parts Center, we receive original spare parts, ensuring that our equipment constantly runs as it should.”

“I will always choose processors processors from Glunz & Jensen. We are used to the high quality, the convenient features and the good cooperation with the company.”

Generally the Glunz & Jensen plate processors are very simple to service and maintain.

* Dansk Avistryk use 1205 x 578 mmm Agfa :N92 VCF plates, as the only one in Denmark.
